“It was my first TICE conference and I will attend again. Having attended other organizations conferences in the past - I learned more at TICE than at the “other” conference I attend every spring. Topics were much more useful to me in my role - more academic and I did not feel like everyone I spoke to was trying to sell me something!”

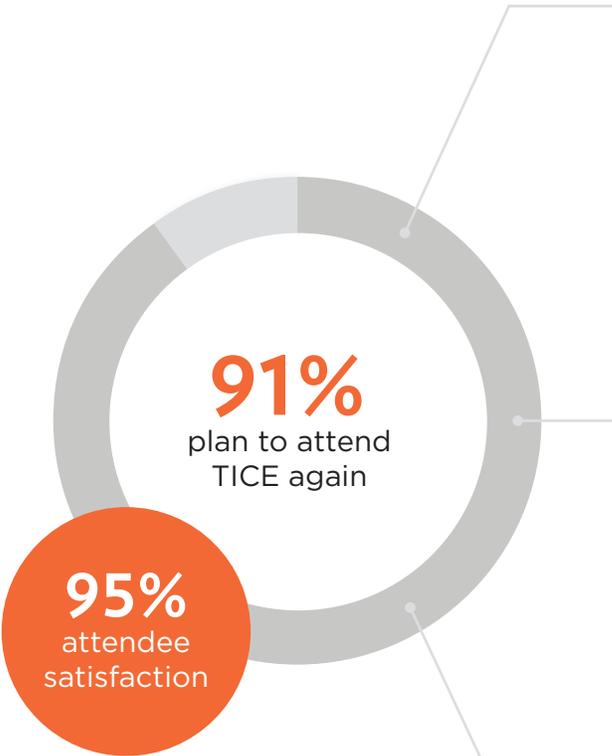

**-TICE 2018 Attendee**

“I was just overwhelmed with all the resources and tools that are available to assist in my functioning being so much better. It really opened my eyes that there is much more to “training” than what is normally expected. Thanks for the enlightenment. I truly applaud you for taking the time and effort to ensure that all pieces of what we do are covered and addressed. From the start up of a company to the everyday maintenance.”

**-TICE 2018 Attendee**

“I loved the size, the choice of workshops, and the fact that the workshops were mostly presented by people like me, sharing best practices... I walked away with so many ideas for my organization that I can use, and some great contacts. I am taking my team of training supervisors to TICE next year.”
